Summary

Final-year Information Technology undergraduate with hands-on experience in software development, backend engineering, REST APIs, Java, Python, and AI/ML. Experienced in building scalable, reusable, and reliable applications using FastAPI, Spring Boot, Flask, SQL, and modern full-stack technologies. Winner of Techathon 3.0 2026 for developing an AI-powered healthcare platform.

Achievements

Winner, Techathon 3.0 2026 (AISSMS)

Awarded Best Healthcare Solution for developing CareSync, an AI-powered patient triage platform using FastAPI, LLM integration, and rule-based decision systems.

Finalist, TrustAI Ideathon 2026 (AI Impact Summit, IIIT Pune)

Selected among the Top 20 teams from 600+ national registrations for an AI-driven innovation.

Finalist, Udyamotsav 2025 (AICTE & MoE Innovation Cell, MIT-WPU)

Shortlisted among 10,000+ registrations for an innovative technology-based startup solution.

Projects

CareSync – AI-Powered Healthcare Recommendation Platform

GitHub

Stack: FastAPI, Python, SQLAlchemy, LLM APIs, REST APIs, Pandas

– Built a **FastAPI REST backend** for AI-assisted symptom analysis and healthcare recommendations with **10+ API workflows**.

– Integrated an **LLM reasoning pipeline** with rule-based emergency handling and a **weighted recommendation engine**, improving recommendation consistency by **10%**.

– Implemented **conversation persistence** and **geolocation fallback** across **20+ test scenarios** with reusable backend workflows.

SplitsVilla – Group Travel & Expense Management Platform

GitHub

Stack: React, TypeScript, Node.js, Express, MongoDB, Socket.io, Claude API

– Built a **full-stack travel and expense platform** with **20+ REST API workflows** for trip planning, property discovery, voting, and expense management.

– Implemented **JWT authentication**, **WebSocket collaboration**, and an **expense settlement algorithm**, reducing payment transactions by **20%**.

– Integrated **Claude API** for AI-powered recommendations and implemented **20+ automated tests** with Vitest and Playwright, improving performance by **10%**.

LiveProof – ML-Based Human Presence Verification

GitHub

Stack: Python, Flask, Scikit-learn, JavaScript

– Built a lightweight **ML-based verification system** using Python and Flask with **10+ behavioral features**.

– Trained a **Logistic Regression classifier** with **confidence scoring**, improving verification reliability by **10%**.

– Tested **real-time behavioral signal collection** across **20+ test scenarios**, with rule-based fallback mechanisms.

Technical Skills

Languages: Java, Python, C, C++, SQL

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS

Backend: Spring Boot, FastAPI, Flask, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, SQLite, SQLAlchemy

AI & ML: LLM APIs, Scikit-learn, Logistic Regression, Feature Engineering, Recommendation Systems, Pandas

Tools & Practices: Git, GitHub, Docker, Agile, Object-Oriented Programming, Data Structures & Algorithms, DBMS, System Design, CRUD, Authentication

Experience

Full Stack Development Intern, JD Solutions

Pune, India

– Developed reusable frontend and backend modules using full-stack technologies and modular practices.

– Designed and integrated REST APIs with database-driven applications for efficient backend communication and data processing.

– Optimized backend performance and used Git-based workflows to build and maintain scalable software modules.

Website Development Intern, EI Systems Technologies

Remote

– Developed responsive, interactive websites using HTML, CSS, and JavaScript with dynamic UI components to improve usability.

– Optimized website responsiveness, performance, and cross-browser compatibility while using Git-based workflows for frontend development.

Education

Savitribai Phule Pune University (SPPU)

Expected 2027

Bachelor of Engineering in Information Technology

Cumulative CGPA: 7.53 / 10
